PROFESSIONAL SUMMARY

Final-year BSc (Hons) Computer Science undergraduate at Eastern University, Sri Lanka, with hands-on experience building **full-stack web applications** end-to-end. Comfortable across **React, Node.js, Laravel, and MySQL**, with a working knowledge of REST APIs, JWT authentication, and modern DevOps practices including Git, Docker, and GitHub Actions. Strong problem-solver, fast learner, and a deliberate communicator who values clean code, technical documentation, and shipping work that actually works for real users. Looking for a **first full-time engineering role** — Sri Lanka or remote — where I can grow alongside an experienced team and contribute from day one.

EDUCATION

BSc (Hons) in Computer Science | Eastern University, Sri Lanka 2021 – 2026

Coursework: Software Engineering, Algorithms, Data Structures, Databases, Machine Learning, Computer Networks.

Diploma in ICT & Computing (Level 4) | IDM Achievers International Campus 2019 – 2020

Grade: **Distinction** • Diploma in English: **Credit Pass**

GCE A/L & O/L | Bt/Bt/Shivananda National School 2006 – 2019

A/L: 3C • O/L: 6A & 3B

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python, C++, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Vite, Responsive Web Design, shadcn/ui, Framer Motion

Backend & APIs: Node.js, Express.js, PHP / Laravel, RESTful APIs, JWT Authentication, Middleware, Postman

Databases: MySQL, PostgreSQL, MongoDB, Database Normalization, Prisma ORM, Sequelize

DevOps & Tools: Git, GitHub, Docker, GitHub Actions, CI/CD, NPM/Yarn, VS Code, Vercel, Cloud (AWS/Azure basics)

CS Foundations: Algorithms & Data Structures, Database Systems, Computer Networks, Operating Systems, Software Engineering, Agile / Scrum

ACADEMIC & PERSONAL PROJECTS

Premier Retail Shop | Full-Stack E-Commerce Platform • [GitHub](#) 2024

- Designed and built a **solo, end-to-end e-commerce platform** with a customer-facing storefront and a premium dark-mode admin dashboard featuring a 3D glassmorphism UI.
- Implemented **QR-based inventory management**, a **bulk discount engine**, live search auto-suggest, and a **driver logistics dashboard** for order fulfillment tracking.
- Built on **Laravel (PHP)** with normalized **MySQL** schema and a mobile-first responsive frontend using **Tailwind CSS**, JavaScript, and Vite.

Waste Collection Route Optimization System • [GitHub](#) 2024

- Built a route-optimization system that minimizes travel distance for municipal waste collection, applying **graph-traversal and shortest-path algorithms** against test datasets.
- Full-stack web application with a **React + Node.js / Express** stack, **MongoDB** for collection-point data, and **Google Maps API** integration for interactive route visualization.
- Iteratively evaluated algorithm performance, documented results, and presented findings to the project supervisor.

Personal Portfolio Website • [Live](#) • [GitHub](#) 2026

- Built with **Next.js 16**, **React 19**, **TypeScript**, **Tailwind v4**, **shadcn/ui**, and **Framer Motion** — fully responsive, dark-themed, deployed on **Vercel** with continuous deployment from GitHub. Working contact form, clean modular architecture, and strict TypeScript throughout.
